DETAILED ACTION

Allowable Subject Matter

1. Claims 1-6 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-4 and 6 recite, inter alia, a multiplexer type flying capacitor voltage detecting apparatus wherein a battery controller comprises a timing table on which generation timing of said switching control signal, activation signal, and transfer command signal are all determined on a common time axis, and timing control for said flying capacitor voltage detecting circuit, said A/D converter, and said battery controller is carried out by outputting said switching control signal, activation signal, and transfer command signal to said flying capacitor voltage detecting circuit, said A/D converter, and said battery controller at the timing regulated in said timing table and according to an order memorized in said timing table. The Art of record does not teach, suggest, or disclose the above limitations, nor would it have been obvious to one of ordinary skill in the art to modify the art of record to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
